

REMARKS

The Examiner's action dated March 3, 2003, has been received, and its contents carefully noted.

The subject matter of claim 2 has been incorporated into claim 1, claim 2 has been cancelled, and claim 3 has been amended to depend directly from claim 1. Claims 1 and 3 are pending. The specification and abstract have been amended to correspond more closely to the claims.

The indication of substantive allowability of claims 2 and 3 is noted with appreciation. As indicated above, claim 2 has been placed in independent form by incorporation of all its subject matter into claim 1.

In addition, in response to the rejection of claim 2 under 35 USC 112, second paragraph, claim 1 has been further amended to specify that each portion has a larger axially sectional area than the grooves formed in a portion of the half bearing mainly subjected to load during rotation of the shaft. It is submitted that the addition of the term "axially" establishes a clear definition of what constitutes the sectional area.

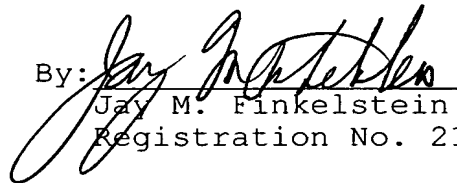

Accordingly, it is requested that the formal rejection of claims 2 and 3 be reconsidered and withdrawn, that claims 1 and 3 be allowed and that the application be found in allowable condition.

In re of Appln. No. 10/025,576

If the above amendment should not now place the application in condition for allowance, the Examiner is invited to call undersigned counsel to resolve any remaining issues.

Respectfully submitted,  
BROWDY AND NEIMARK, P.L.L.C.  
Attorneys for Applicant(s)
